- (ii) Discuss a theme of the poem that you would like young people to learn from.

REGISTER STUDY

LANGUAGE OF SCIENCE

Study the sample given below and answer the questions that follow

When calcium carbonate is heated strongly, carbon dioxide escapes, leaving a residue of Calcium-oxide.

When calcium carbonate is added to an acid, carbon dioxide is released, and the salt of the acid is formed, e.g. calcium carbonate added to hydrochloride acid will yield a solution of calcium hydrochloride. Effervescence is caused by the escaping carbon dioxide.

QUESTIONS

1. The source of sample one is from
 - a. popular magazine
 - b. chemistry text book
 - c. newspaper
 - d. journal
2. What is the purpose of this language?
