

**Name of School: Penang Sangam Primary School**

**Year: 7**

**Subject: Mathematics**

**Worksheet: 1**

**Question One**

- a.  $45673 + 28997 - 15759 = \underline{\hspace{2cm}}$
- b.  $7235 \times 49 = \underline{\hspace{2cm}}$
- c.  $203.92 - 45.67 = \underline{\hspace{2cm}}$
- d.  $614870 = 600000 + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$
- e.  $738 \div 9 = \underline{\hspace{2cm}}$

**Question Two**

- a. Write the following numbers in words.
  - i. 39672
  - ii. 16002
- b. State the place value of the underlined digits in the numbers given below.
  - i. 25092
  - ii. 634.29
- c. Show 406.32 on an abacus.
- d. Arrange the numbers given below in ascending order.  
635, 967, 828, 447, 519
- e. Arrange the numbers given below in descending order.  
5001, 9094, 7403, 6009, 8080

**Question Three**

- a. Mr Smith had 767 sheep on his farm. After buying some more sheep from Mr Khan, he has a total of 950 sheep. How many more sheep did Mr Smith buy?
