

YEAR 8  
BASIC SCIENCE  
WORKSHEET 5  
SOLUTION

**Short Answer Questions**

1. Mixtures are often separated when pure substances are needed from them.
2. Evaporation (heating the solution) was used to separate salt from salt solution.
3. Substance left after the experiment is called residue.

**States of matter**

1. Solidification / Freezing
2. Condensation
3. Melting
4. Sublimation
5. Evaporation / Boiling
