

Penang Sangam Primary School

Year 3

Mathematics

Worksheet 2

Strand	Number and Numeration
Sub Strand	Whole Numbers
Content Learning Outcome	Rounding numbers At the end of the lesson, children should be able to round of numbers to the nearest 10s and 100s

Lesson Notes

Rounding Off Numbers to the nearest 10:

When we round off to the nearest ten we look at the ones. If it is 5 or more, we round it up but when it is 4 or less we round it down. Example: 26(26 is in between 20 and 30)

20 26 30

6 is more than 5 so round it up to 30

Rounding Off Numbers to the nearest 100:

When we round off to the nearest hundred we look at the tens and ones. If it is 50 or more, we round it up but when it is 49 or less we round it down. Example: 127(127 is in between 100 and 200)

100 127 200

27 is less than 50 so we round it down to 100

Activity 1

Round off the underlined numbers to the nearest ten by drawing a circle around the answer.

- 40 43 50 2. 70 75 80
- 60 69 70 4. 80 81 90
- 90 94 100

Activity 2

Round off the underlined numbers to the nearest hundred by drawing a circle around the answer.

- 400 416 500 2. 200 298 300
- 300 361 400 4. 400 551 600
- 600 629 700
