$$\frac{3}{5} + \frac{1}{5} = \frac{6}{5}$$

Rule: Add the numerator whilst the denominator remains the same.

Add the following fractions

1. $\frac{1}{4} + \frac{2}{4} = $ — — — — — —

2. $\frac{3}{5} + \frac{1}{5} = $ — — — — — —

3. $\frac{2}{9} + \frac{2}{9} = $ — — — — — —

4. $\frac{3}{6} + \frac{2}{6} = $ — — — — — —

5. $\frac{2}{7} + \frac{3}{7} = $ — — — — — —

6. $\frac{1}{3} + \frac{1}{3} = $ — — — — — —

7. $\frac{3}{6} + \frac{1}{6} = $ — — — — — —

8. $\frac{5}{8} + \frac{2}{8} = $ — — — — — —

The End
