<b>TOPIC</b>	Telling the time using the analog clock
<b>RESOURCES</b>	Year 4 Mathematics Text

**A. NOTES**

There are two major types of clocks: digital and analog clocks. Analog clocks have two main important hands: a long minute hand and a short hour hand. Some have another small red hand which is called the second hand. They tell the time of day in hours and minutes. 1 day = 24 hours; 1 hour = 60 minutes; 1 minute = 60 seconds.

When the minute hand points at 12, it shows that there is 0 minutes left, so in this case the o'clock time now will be indicated by the hour hand. e.g.

**ACTIVITY**

For each time, you need to either draw in the hands or write the time.

3 o'clock	<b>8</b> o'clock	<b>11</b> o'clock
