नीचे दिए गए बोधन खण्ड को ध्यान से पढ़कर प्रश्नों को हल कीजिए ।

दुनियाँ में दो तरह के लोग होते हैं । एक वो जो हमेशा सच बोलते हैं और दूसरा वो जो सदा झूठ बोलते हैं । वर्तमान में दोनों तरह के लोग जीते हैं । जहाँ मान-सम्मान का सवाल आता है वहाँ सच बोलने वालों को ही आदर मिलता है ।

५ झूठ बोलना पाप है । जहाँ झूठ एक निर्दोष आदमी का चरित्र और नाम को बरबाद कर सकता है, वहीं सच एक मानव का सर गर्व से ऊँचा उठाता है । झूठा आदमी हीन भावना में डूबा रहता है क्योंकि वह जानता है कि उसने झूठ बोला है । पकड़े जाने का भय उसे हमेशा लगा रहता है । वहीं पर सच्चाई के पुजारी के चेहरे पर चिन्ता, पछतावा, घबराहट आदि के चिन्ह दिखाई नहीं देगी । वह खुश दिखाई देगा क्योंकि वह जानता है कि उसने सच कहा है ।

१० झूठ के पकड़े जाने पर लोग दूसरों से विश्वास और प्रेम खो बैठते हैं । ऐसे लोगों को लोग झूठा कहते हैं, उनसे दूर हो जाते हैं । समाज में ऐसे लोगों को कोई नहीं पसन्द करता है । चाहे कितनी चालाकी और होशियारी से झूठ बोला गया हो परन्तु उसकी सच्चाई एक दिन सामने अवश्य आती है । सच बोलने वालों को समाज में ऊँचा दर्जा मिलता है । वह दूसरे लोगों के लिए नमूना बनता है । लोग उनका आदर, विश्वास और गुण-गान करते हैं । हमें भी १५ सदा सच्चाई के रास्ते पर चलना चाहिए ।

SECTION A COMPREHENSION PASSAGE (5 marks)

Read the passage below and answer the question that follows.

HALF THE WORLD IS WATER

If a man in a space-ship looked down at the earth from many miles high above the island of Tahiti, he would see mainly water. He might think that the earth was one giant ocean with little land.

5 If, however, he looked down at the earth from a position above Europe, he would see mainly land – the continents of Europe and Asia and part of Africa. Nearly seven-tenths of the earth’s surface is covered in water. One ocean, the Pacific, has an area of 63 million square miles.

10 Many years ago people thought that the land under all this water was flat. Now they know that this is not so. There are as many mountains under the sea as there are on the land. Scientists believe that in the early days of the earth’s history, it was a ball of burning gas. When this ball began to cool, clouds of water vapour hung in the sky. This vapour turned into rain, and for thousands of years this rain poured down onto the earth. The rain filled the hollows on the earth’s surface and formed oceans.

15 At first there was very little salt in the sea. The salt was brought into the sea by rivers. It is possible to measure the age of the earth by measuring the amount of salt in the sea. Scientists can calculate how many years it took for this amount of salt to be carried from the land into the sea.
