

SUVA SANGAM COLLEGE**YEAR 10****MATHEMATICS****WORKSHEET 10**

Strand 4:	Trigonometry
Sub-strand:	Pythagoras Theorem and trigonometric functions
Content learning outcome	<ol style="list-style-type: none"> 1. Study and discuss Pythagoras Theorem and how it is applied to any given right – angled triangle. 2. Discuss properties of Basic Trigonometric functions and use recommended calculator to calculate unknown angles. 3. Study and demonstrate a clinometer in practical situation appropriately.

Questions

No	Concept in brief: use Pythagoras theorem to solve for the unknown. Use the calculator to find the values of angles shown. And determine the angle of elevation and depression.
1.	<p>Find the value of the following:</p> <p>(i) $\sin 30^\circ + \tan 45^\circ$</p> <p>(ii) $\cos 60^\circ + \sin 180^\circ$</p>
2.	<p>Study the diagram given below which shows a boat at a distance from a cliff.</p>  <p>Calculate the angle of elevation.</p>
3.	<p>For the right angled triangle shown below, find the value of length x.</p>
