**Worksheet 1 Solutions 2021**

**MATCHING**

1. D
2. A
3. B
4. C

**FILL IN THE BLANKS**

1. energy
2. decomposer
3. carnivore

**PARAGRAPH WRITING**

Human activities endanger species. One such harmful activity is deforestation where humans remove large areas of forests. Deforestation is harmful because it leads to loss of animals habitat. For example, when trees are cut down, nests of birds are destroyed and they have to make another home. This problem can be solved if we plant more trees. Another way of solving this problem is to make laws that stop large areas of trees being removed at one time. In this way, all habitats will not be destroyed at once. Our actions will help to protect endangered species.
