WEEK 9 MATHS SOLUTION YEAR 4

Strand: Measurement

Sub- strand: Length /Area

These non- standard units are used to measure length and widths of shapes.
 Some of the examples of non-standard units are:

For example if you want to know the **length of your hand** you can use **your hand span** to measure. **Arm length** can be used to measure the **height of the door**. **Foot, step, or pace** can be used to measure the **length of your classroom**.

Activity

Now you have to estimate or guess each of these lengths. After guessing then you use one string to measure the length and then place it on your ruler to know the actual length.

<i>Unit</i>	<i>Distance to measure</i>	<i>Estimate / guess the length</i>	<i>Check (measure the actual length)</i>
Hand span	Length of the coffee table	<i>DEPENDS ON STUDENT'S MEASUREMENT</i>	
Arm length	Height of the window		
Step or pace	Length of your bedroom
