ENGLISH

WORKSHEET # 3

Read the comprehension and answer the questions given below:

Litea and Peni are very excited as they board the bus to town. Mum and dad have been encouraging them to save some money, spend some, and to share some too. They have been saving their pocket money for four weeks, and will now have a chance to spend and share some of their earnings. Before they catch the bus, they each put \$3 into their moneybox to save. Litea and Peni are learning to set savings goals, and to keep their saving plan. The children need some new shoes for their school. The shoes that Litea likes are for sale on \$25. The shoes that Peni likes are not on sale and cost \$35. The family get value for money when they purchase Litea's shoes. The family has saved for the shoes and they pay for these with cash. Peni is going to high school in six months' time, and will need a new school uniform. Mum and Dad want to pay for this over time rather than pay cash now, so they put the uniform on layby. This way they can pay a cash deposit upfront and small amounts each week until the uniform is paid in full then they can take the uniform. Litea has outgrown her bed, so the family goes to a furniture shop. After much looking, Litea finds a perfect one. Litea needs her new bed now so Mum and Dad decide to pay for it by hire purchase. This way they can pay for the bed in installments overtime, but they get to take it home immediately. The bed will cost more if paid by hire purchase than if they paid with cash. They have lunch at the cafeteria before they head home.

ANSWER IN FULL SENTENCE:

1. How long have Litea and Peni being saving for their pocket money?

2. What did they do before catching the bus?

3. Where is Peni going after six months?

4. When can they take the uniform home?

5. Who needs a new bed?

6. What does it mean to pay an item on hire purchase?
